

E-LEARNING COURSE

National Construction Safety Awareness Training

This Construction Safety Awareness course was developed by the construction industry as a national course to give you an overview and encourage a general awareness of the health and safety issues you'll be faced with on any worksite in Canada.

This course is intended for everyone working in any sector of the construction industry.

Students who successfully complete this course will earn 2 Gold Seal credits and will be able to identify:

- The rights and responsibilities that employees and an employer has on a worksite
- Communications that must take place on any job site to ensure safe work practices
- Measures you need to take off the job site to make sure you're ready for work on the job site
- Personal Protective Equipment you'll be using on the job site, and how to use it effectively
- Precautions you need to take when working with workplace chemicals
- Types of hazards you may encounter on a jobsite, and how to recognize, assess and control them
- Tools, equipment and vehicles you'll be using on site and how to use them safely
- Precautions to take when working at heights, excavating and trenching, and working near powerlines

This course is self-paced and is approximately 3 hours in length.
