

E-LEARNING COURSE

Pipeline Construction Safety Training

This course has been designed to help the pipeline worker know how to respond to worksite health and safety issues by taking the worker through the entire pipeline construction process from beginning to end, and will provide workers with the tools to help them:

- Build their skills to Recognize Hazards
- Learn how to Assess Hazards
- Learn how to Control Hazards
- Learn to operate Vehicles and Equipment Safely
- Learn how to respond to Emergencies

A final mark of 100% is required in order to receive a certificate of completion.

Students who successfully complete this course will be able to:

- Improve the safety of their company as a whole
- Learn necessary emergency procedures
- Recognize safety hazards before they happen

This course is self-paced and is approximately 6 hours in length.
