

Industrial Construction Superintendent

Wm. Groves Limited requires a Construction Superintendent experienced in the industrial field specializing in concrete forming, constructing machine bases, pads, berms, spill containment areas including associated underground drainage systems.

The superintendent will also be involved in general yard maintenance for industrial clients, quoting small daily concrete related repairs and working within confined spaces.

Experience with the cleanup of bitumen product spills and placing asphalt would be an asset.

24 hour emergency service is offered to our clients and the applicant's expertise would be required during these emergencies.

Require Skills:

- At least 10 years construction experience (5 of those as superintendent)
- Sewer and watermain experience is advantageous
- Post-secondary school education is an asset
- Good communication skills with clients
- Able to think outside of the box for creative solutions for clients dilemmas'
- Hands-on experience helps when directing the employees and explaining processes to clients.
- Self-starter able to work with minimal guidance
